

WHAT TO LOOK FOR IN A CAT CARRIER

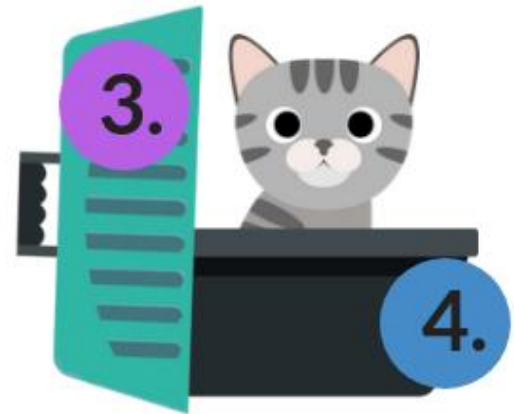

58%

of cat caregivers report their cat **hates** going to the veterinarian.

Acclimating your cat to his carrier can reduce levels of stress getting to the vet.

1. Opening in the front.

2. Sides offer a visual shield.

3. Removable top half.

4. Impact/water resistant plastic.

OTHER WAYS TO REDUCE STRESS

Wipe or spray synthetic pheromone in the carrier or towels.

Place toys and familiar bedding inside the carrier.

Increase familiarity by leaving the carrier out in a common space.

Immediately reward your cat with treats for entering the carrier.
